

**Compact. Intuitive. Indestructible.**

## Industrial Touchpanel Solutions

Experience the next generation of robust and innovative touchpanel solutions, designed for industry, mechanical engineering and IoT applications.

### Our Product Lines

#### Standard Touchpanels

##### TP4 / TP8 / TP10

Versatile touchpanel solutions for building automation, smart home and industrial control.

- 4", 8" and 10" display sizes
- ARM Cortex-A55 Quad-Core
- KNX/Modbus/IoT integration
- Frameless designs

#### Pro Touchpanels

##### TP8 Pro / TP10 Pro

Robust industrial displays for harsh environments with extended interfaces and maximum reliability.

- 8" and 10" IPS displays
- IP65 protection class
- Dual Ethernet & RS-485
- 10-point multitouch
- TP10 Pro with Android or sinnux, your choice

### More than a touchpanel

#### Touchpanels and HVACloud

##### Single source

Panel, system software, cloud and portal from a single source: remote maintenance without open ports, updates without a site visit, aligned with the Cyber Resilience Act.

#### Customer portal

##### For customers

Your touchpanels, orders, returns and permissions in one place. Every company sees only its own data.

### Why sinnotrade Touchpanels?

#### High-Quality Displays

IPS LCD technology with brilliant colors and wide viewing angle for perfect readability from any direction.

#### Robust & Durable

Designed for industrial use with high-quality materials and IP65 protection (Pro series).

#### Flexible Connectivity

Ethernet, RS485, RS232, GPIO and more, seamless integration into existing systems.

#### Comprehensive Support

Personal consultation, technical documentation and quick response times for inquiries.

### What you can rely on

#### ISO 27001

sinnograde is ISO 27001 certified for development and operation.

#### Siemens Solution Partner

sinnograde, for Smart HMI.
